```
MARK A. HOVEY AND DOUGLAS C. RAVENEL
```

AbSTRACT. In this paper, we study the cobordism spectrum $M O\langle 8\rangle$ at the prime 3. This spectrum is important because it is conjectured to play the role for clliptic cohomology that Spin cobordism plays for real $K$-theory. We show that the torsion is all killed by 3, and that the Adams-Novikov spectral sequence collapses after only 2 differentials. Many of our methods apply more generally.

Two change of rings isomorphisms

We want to study the 3-primary Adams spectral sequence for MO〈8〉. Recall that

$$
\mathcal{A}_{*} \cong E\left(\tau_{0}, \tau_{1}, \ldots\right) \otimes P\left(\zeta_{1}, \zeta_{2}, \ldots\right),
$$

with $\left|\tau_{n}\right|=2 \cdot 3^{n}-1$ and $\left|\zeta_{n}\right|=2 \cdot 3^{n}-2$. The dual of the subalgebra $\mathcal{P} \subseteq \mathcal{A}$ generated by the Steenrod reduced power operations is

$$
\mathcal{P}_{*} \cong P\left(\zeta_{1}, \zeta_{2}, \ldots\right) .
$$

$\mathcal{A}$ has a subalgebra $\mathcal{E}$ with

$$
\mathcal{E}_{*} \cong E\left(\tau_{0}, \tau_{1}, \ldots\right) .
$$

and

$$
\operatorname{Ext}_{\mathcal{E}_{*}}(\mathbf{Z} / 3, \mathbf{Z} / 3) \cong P\left(a_{0}, a_{1}, \ldots\right)=: V .
$$

Here $a_{n}$ corresponds to $v_{n} \in \pi_{*} B P$, where $v_{0}=3$. It has Adams filtration 1 and topological dimension 2( $3^{n}-1$ ).

## Introduction

MSU at $p=2$
There is a Cartan-Eilenberg spectral sequence converging to our Adams $E_{2}$-page with

$$
\begin{align*}
E_{1}^{*, *, *} & \cong \operatorname{Ext}_{\mathcal{P}_{*}}\left(\mathbf{Z} / 3, \operatorname{Ext}_{\mathcal{E}_{*}}\left(\mathbf{Z} / 3, H_{*} M O\langle 8\rangle\right)\right)  \tag{1}\\
& \cong \operatorname{Ext}_{\mathcal{P}_{*}}\left(\mathbf{Z} / 3, H_{*} M O\langle 8\rangle \otimes V\right) .
\end{align*}
$$

The coaction of $\mathcal{E}_{*}$ on $H_{*} M O\langle 8\rangle$ is trivial since the latter is concentrated in even dimensions.

## Two change of rings isomorphisms (continued)

Introduction
MSU at $p=2$
Wilson spaces and Hopf rings
$H_{*} B O\langle 8\rangle$ and $H_{*} M O\langle 8\rangle$

$$
\begin{align*}
E_{1}^{*, *, *} & \cong \operatorname{Ext}_{\mathcal{P}_{*}}\left(\mathbf{Z} / 3, \operatorname{Ext}_{\mathcal{E}_{*}}\left(\mathbf{Z} / 3, H_{*} M O\langle 8\rangle\right)\right)  \tag{1}\\
& \cong \operatorname{Ext}_{\mathcal{P}_{*}}\left(\mathbf{Z} / 3, H_{*} M O\langle 8\rangle \otimes V\right) .
\end{align*}
$$

The coaction of $\mathcal{E}_{*}$ on $H_{*} M O\langle 8\rangle$ is trivial since the latter is concentrated in even dimensions. This leads to the second isomorphism of (1).

MSU at $p=2$
Wilson spaces and Hopf rings
$H_{*} B O\langle 8\rangle$ and $H_{*} M O\langle 8\rangle$
Two change of rings isomorphisms

The Adams spectral sequence for $\mathrm{MO}\langle 8\rangle$

## The Adams spectral sequence for $M O\langle 8\rangle$ (continued)

String cobordism at the prime 3

## Carl McTague Vitaly Lorman Doug Ravenel

## Introduction

MSU at $p=2$
Wilson spaces and Hopf rings
$H_{*} B O\langle 8\rangle$ and $H_{*} M O\langle 8\rangle$

Two change of rings isomorphisms

The Adams spectral sequence for $M O\langle 8\rangle$

This chart shows the resulting $E_{3}$ page with torsion elements shown in blue.

## The Adams spectral sequence for $M O\langle 8\rangle$ (continued)

## String cobordism at

 the prime 3
## Carl McTague <br> Vitaly Lorman <br> Doug Ravenel

## $E_{3}$ page

$\begin{array}{lllllllll}0 & 16 & 32 & 48 & 64 & 80 & 96 & 112 & 128\end{array}$

Introduction
MSU at $p=2$

Doug Ravenel

## $E_{3}$ page

$$
\begin{array}{lllllllll}
0 & 16 & 32 & 48 & 64 & 80 & 96 & 112 & 128
\end{array}
$$

This is the previous chart with $\bar{a}_{2}^{3}$ tensored in.

## The Adams spectral sequence for $M O\langle 8\rangle$ (continued)

$E_{3}$ page

$$
\begin{array}{lllllllll}
0 & 16 & 32 & 48 & 64 & 80 & 96 & 112 & 128
\end{array}
$$

This is the previous chart with $\bar{a}_{2}^{3}$ tensored in. It shows a larger range of dimensions with higher Toda type differentials, with more elements removed to avoid clutter.

Carl McTague
Vitaly Lorman
Doug Ravenel
